

Grazing and gully management field walk

Hellsgate Station, QLD

Wednesday 3 May 2023

This event is funded by the Stomping Out Sediment project, funded through the Australian Government's Reef Trust.

Venue: Hellsgate Station,
Mt Wyatt Rd, near Collinsville

Time: 9.00am – 12.00pm (noon)
Morning tea and lunch provided

RSVP: by 26 April 2023

Hellsgate has completed a range of gully and scald rehabilitation measures and implemented different grazing practices over the last three years. We will look at how well these have performed.

Grazing management consultant, Dick Richardson, Nature's Equity, will discuss grazing planning.

This field walk is supported by Meat & Livestock Australia (MLA). NQ Dry Tropics has partnered with MLA to develop a Producer Demonstration Site to accelerate the adoption of grazing management practices in the Burdekin.

Dick Richardson, Nature's Equity
