REGISTER HERE 

### MARY RIVER

**THURSDAY  
10 NOVEMBER**

Wilderness Retreat  
9:30am to 12:30pm

REGISTER HERE 

Climate projections, as well as the lived experience of many on the land, suggests that producers in the north are facing growing uncertainty in seasonality and increasing climate variability.

Territory NRM, together with Bush-Agri, brings you a workshop session tailored to the specific challenges facing the Top End grazing industry.

- Identify climate risks to your business
- Assess your business's current resilience status
- Identify your business's resilience priorities
- Planning for a more climate resilient grazing business

#### Building resilience to:

- Changing rainfall patterns
- Increased temperatures
- Cyclones
- Flood events/water scarcity
- Intense wildfires
- Biosecurity threats

Free event. Registration required by Friday, 28 October for catering purposes.
