A.PIA.0070 - Processing Innovation Awards

The Processing Innovation Awards have been offered by MLA and AMPC since 2002. The award is to allow processors to demonstrate the innovation that they have applied to their processing activities. The awards were promoted throughout the red meat processing industry, entries were collected and standardized for ease of judging, and a final summary of entries was prepared for the judges. A prize was offered to the winner, and their innovation story was disseminated.
