# Goats in Focus: eID device retention

## Research insights for improved retention

 Thursday 18 June 2026 | 12.00pm – 1.00pm AEST

 Online Webinar – Microsoft Teams

**This online session provides key findings from research into the factors contributing to NLIS-approved eID device retention on-farm**

Hear from Dr Claire Payne, Will Sheard and Sam Harburg of AbacusBio as they share key findings from their research across fourteen properties in New South Wales, Queensland and South Australia. Claire, Will and Sam will step through what the project learned about the factors influencing tag retention, tag placement tips and some suggestions to

improve on-farm retention as informed by the study.

### You'll hear about:

Factor influencing device retention and best practice techniques including:

- Device placement
- Production system
- Handling infrastructure
- Sanitation

This project is supported by Meat & Livestock Australia through funding from the Australian Government's Livestock and Animal Traceability Development, Implementation and Improvement Grant.
