

# GOAT WEBINAR + Q&A

An online workshop delivered as part of the MLA Goat Roadshow series

Tuesday 21 May 2024 | 7:00pm – 8:30pm AEST

## How goats can be part of the carbon sustainability system

Understanding carbon emissions and sustainability in rangeland and farmed goat situations is essential as the Australian livestock industry moves towards meeting carbon targets.

As goat producers, you're invited to learn about how goats can be part of the carbon sustainability system in this FREE Meat & Livestock Australia webinar.

Speakers will provide an overview of current research in this field, as well as useful and practical insights on ways to improve your understanding and increase sustainability.

### Hear from:

- University of Queensland's Senior Lecturer in Animal Science and Production Dr Sarah Meale: project leader on the Goat Industry Sustainability

Credentials Project which is aiming to quantify greenhouse gas emissions from goats, assess carbon balance and potential for sequestration.

- MLA's Project Manager - Sustainability Adoption Hilary Connors and Agrista consultant Tanisha Shields on the Carbon Edge package: a training program for the red meat industry, providing an understanding of the opportunities for emissions reduction and carbon storage activities in a livestock grazing business.
- MLA's Project Manager - Environmental Markets and Sustainability Jenny Lim on the Carbon Calculator: online greenhouse gas calculator, updated earlier this year to include goat systems, which enables producers to increase carbon awareness and determine their net GHG emissions position.
- Producer case study.

## AGENDA

7.00pm	<b>Welcome</b> MLA has a range of R&D projects and marketing levy funding aimed at ensuring the long-term sustainability and productivity of Australian goat producers.	<b>Dr Daniel Forwood</b> Project Manager - Sheep and Goat Productivity, MLA
7.15pm	<b>Goat Industry Sustainability Credentials Project</b> This three-year project aims to quantify the greenhouse gas emissions of goats and assess the carbon balance and potential for sequestration for producers on demonstration sites.	<b>Dr Sarah Meale</b> Senior Lecturer in Animal Science and Production, University of Queensland
7.30pm	<b>MLA Carbon Edge</b> Two-day training program to help producers understand opportunities for emissions reduction and carbon storage activities in a livestock grazing business.	<b>Hilary Connors</b> Project Manager - Sustainability Adoption, MLA, and <b>Tanisha Shields</b> Consultant, Agrista
7.45pm	<b>MLA Carbon Calculator</b> Increase carbon awareness and determine net GHG emissions position.	<b>Jenny Lim</b> Project Manager - Environmental Markets and Sustainability, MLA
8.00pm	<b>Producer case study</b>	
8.15pm	<b>Your questions answered</b> We'll invite today's speakers to conclude with a facilitated panel session to answer your questions.	
8.30pm	<b>Close</b> We'll leave you with details on where to find more information and what other goat industry events are coming up.	

## REGISTRATION IS ESSENTIAL TO GAIN ACCESS TO THE WEBINAR.

Register for the webinar at <https://bit.ly/MLAGoats-May24>

Can't make the webinar date? Register anyway! We'll record the webinar and distribute the link.

What time does this start in my state?

NSW / Vic / Tas / Qld	SA / NT	WA
7.00pm (AEST)	6.30pm (ACST)	5.00pm (AWST)
