## **Review and update of the Australian Meat Industry Training Package support materials**

### **Milestone 6 report**

Meat & Livestock Australia acknowledges the matching funds provided by the Australian Government and contributions from the Australian Meat Processor Corporation to support the research and development detailed in this publication.

This publication is published by Meat & Livestock Australia Limited ABN 39 081 678 364 (MLA). Care is taken to ensure the accuracy of the information contained in this publication. However MLA cannot accept responsibility for the accuracy or completeness of the information or opinions contained in the publication. You should make your own enquiries before making decisions concerning your interests. Reproduction in whole or in part of this publication is prohibited without prior written consent of MLA.

## 1 Milestone requirements

Milestone requirements

- priority 4 and 5 developments completed
- dissemination strategy completed
- product uptake figures of all revised materials supplied.

### 1.1 Progress report on all developments

---

The 290 sets of unit materials developed under this project have now been completed. The final disks of materials went on sale on November 1<sup>st</sup> 2007. Disks are being sold as follows:

- *Certificate II in Meat Processing (Abattoirs)* containing materials for 162 of the 166 units from that qualification
- *Certificate III in Meat Processing – abattoirs sector*, containing materials for all 93 Units of Competency
- *Certificate IV in Meat Processing*, containing materials for 39 of the 66 Units of Competency.

The final development progress report is attached – see Attachment 1.

### 1.2 Dissemination strategy completed

---

Training Managers and RTOs have been /will be informed of the 1 November release date through:

- Training Managers network meetings
- the MI&QA conference
- the Meat Retailing conference
- Training Package Implementation workshop meetings
- the November and December issues of *Mintracker*
- an entry in the 'news' section of the MINTRAC website.

The materials have also been listed in the MINTRAC product catalogue – see an extract from the Catalogue in Attachment 2.

In addition, a unit-by-unit listing of materials available for the Training Package has been added to the MINTRAC website, on <http://www.mintrac.net.au/traing-lis.asp>.

### 1.3 Ongoing management of the materials

---

An Issues Register has been created to record all feedback and recommended corrections to the Training and Assessment materials. Critical issues will be addressed immediately and all previous purchasers notified of the corrections. Less important corrections will be addressed in an annual revision of the materials. Product CDs will receive a new version number each year.

### 1.4 Product uptake figures

---

The disks went on sale on 1<sup>st</sup> November 2007. Orders have now been received for four disks. It is anticipated that it will be some time before all RTOs realise that the products are ready for purchase. Future sales figures will be included in the quarterly product sales figures supplied to MLA.

## **1.5 Remaining developments**

---

There are approximately 135 Units of Competency within the Australian Meat Industry Training Package which still do not have full sets of Training and Assessment support materials. MINTRAC is currently preparing a Project submission to cover the remaining developments – this submission will seek funding from a range of sources.
