

Grazing fundamentals EDGE Workshop

Katherine, NT – 17th November 2022

VENUE Katherine Research Station, Stuart Highway

TIME 8:00am to 5:00pm

Grazing fundamentals EDGE is a one-day workshop designed to give you a broad understanding of the components of the grazing production system and the core, scientifically-backed principles behind optimising grazing land productivity.

Attending this workshop will help you to:

- better understand the connection between land condition, pasture growth and animal production
- understand how climate influences pasture growth
- allow for climate variability when planning livestock management
- better align herd management with seasonal changes in pasture condition
- build a seasonal climate profile for your location.

What you will learn:

- environmental regulators of pasture growth and quality
- local seasonal pasture growth patterns and key decision dates
- how soil properties influence pasture growth
- how grazing affects pasture plants, their productivity and growth
- how to assess land condition and how this impacts on carrying capacity
- when and how to use pasture spelling
- principles behind successful grazing systems
- how to account for different classes of animals when assessing grazing pressure
- what's involved with forage budgeting and calculating carrying capacity.
