Acknowledgement and support

CalfWays, the dairy industry's roadmap to more sustainable calf management has been developed by Dairy Australia with the assistance of Schuster Consulting Group. Through the course of the development, more than 150 stakeholders from the dairy and beef industries were consulted on key challenges to improving surplus calf management and the opportunities surplus calves presented to both industries. An advisory committee, comprised of dairy farmers, dairy processors and representatives from the red meat and livestock industry, assisted in the development of the roadmap. Dairy Australia and Schuster Consulting Group gratefully acknowledge the contribution made by these stakeholders and their support in the development and implementation of CalfWays.
