

# Take control of your stocking rates

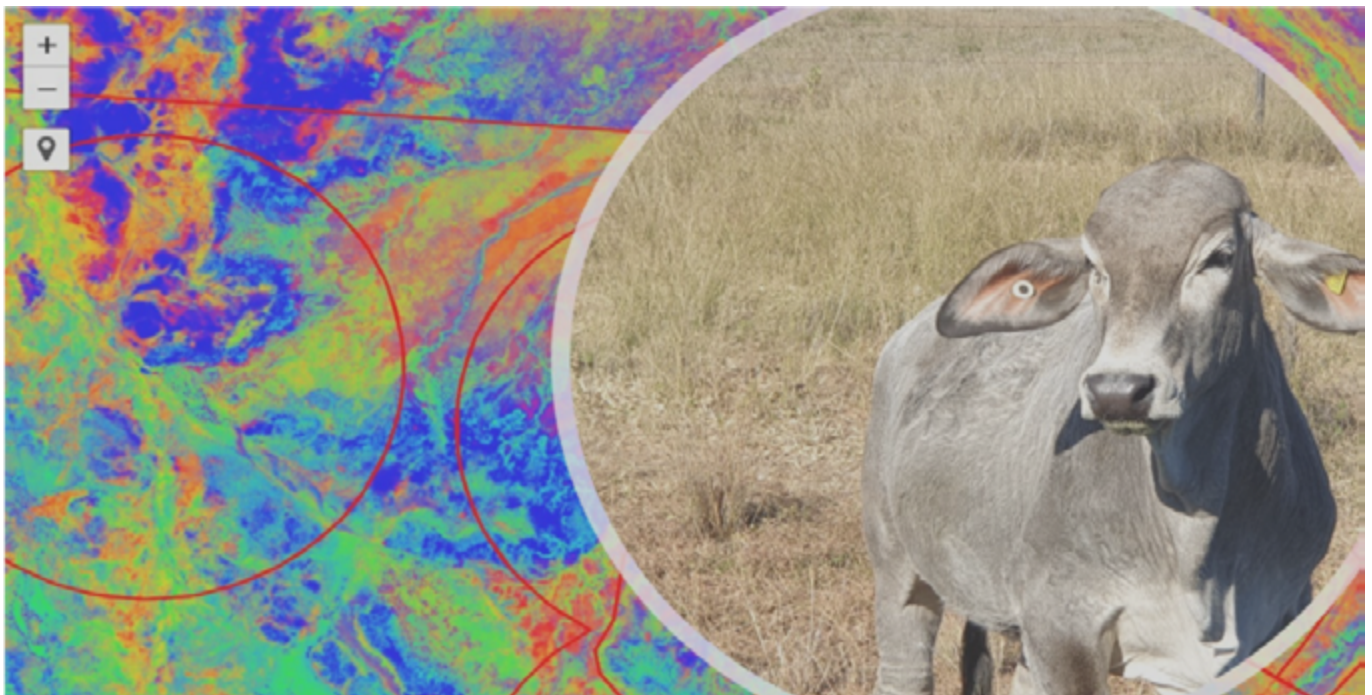

**Learn how to accurately create forage budgets by participating in a new training package:  
Satellite-assisted forage budgeting**

This training packaging will equip you with the skills to:

- ✓ reliably estimate and record pasture yields
- ✓ develop forage budgets and predict seasonal carrying capacity
- ✓ combine paddock observations with satellite imagery to determine precise feed estimates
- ✓ use satellite imagery to assess groundcover and new pasture growth.

**How:** Rangeland management advisor Col Paton and remote sensing specialist Phil Tickle will coach you in five face-to-face and remote sessions. During these sessions, you'll learn how to interpret paddock information on-ground and from satellite imagery to create forage budgets for your property.

**Investment:** \$2,082.50/business+travel (GST exclusive). MLA has subsidised the cost for all red meat producers. An additional MLA subsidy is available to previous EDGE workshop participants.

**Registration is essential  
as places are limited.**
