

Cost of Production workshop

Have you ever wondered what the potential is to improve the long term efficiency of your livestock production system? And what the most profitable opportunities are and how much it will cost you to implement them?

Then this workshop is for you—John Francis from Holmes Sackett will work through how to go about finding out the answers to these questions and more in a two day course.

What?

This training opportunity will teach you how to calculate your cost of production (CoP), identify where it is useful, and help you to identify opportunities to improve efficiency and profitability.

- Learn what CoP is and how it can be a useful indicator of possible opportunities to improve farm performance and profitability
- Learn how to calculate CoP using the MLA CoP calculators
- Learn what the CoP is for your own enterprises
- Learn how to identify opportunities for increasing profits
- Learn how to use the CoP calculator to plan for improvements
- Learn how to run CoP scenarios to quantify improvements
