

Save the date: Wednesday 12th September
Deakin University, Warrnambool

Innovation Day is a one day event designed to equip farmers and service providers with information, contacts and skills to advance their business.

Innovation Day will provide opportunities for skill development and networking with the main focus of the day being cutting edge innovation in each of our sectors including wool, cropping, dairy and red meat production; as well as showcasing synergies and cross over application across the sectors.

There will be ten workshops held throughout the day in five streams, followed by an industry dinner with a special guest speaker and entertainment.
