

You're invited

Is it economically worthwhile to fertilise sown pastures?

WHAT	Webinar: Producer Demonstration Site
WHEN	Wednesday 22 July 2020 1:00pm – 2:00pm
WHERE	Online

MLA's Producer Demonstration Site (PDS) program supports producers to validate the value of integrating new management practices/skills into their business.

Overview of the Producer Demonstration Site

Using paired comparisons across four properties in the western Darling Downs region, this PDS aims to:

- demonstrate how strategic fertilising and controlled grazing management can restore the productive potential of rundown sown pastures
- quantify the production benefits of addressing soil nutrient imbalances in rundown sown pastures
- assess the economic value of fertilising rundown sown pastures.

What's on the webinar agenda?

1. **Overview** of the fertilising and grazing management strategies applied throughout the PDS
2. **Summary** of the results from the first two years of the trial, including changes in soil fertility, pasture productivity and diet quality
3. **Strategies** to ensure producers' fertilising approach complements seasonal conditions and changes in soil fertility
4. **Advice** on how to initiate a successful pasture fertilising program in rundown sown pastures.

October 2018 – start of project

April 2020 – after 2 yrs fertiliser & wet season spelling
