

*NE NSW Sheep and cattle producers are invited to a workshop on*

# Fertiliser Decision Making

**These workshops will provide a detailed overview of soil fertility issues, and help participants develop a tailored fertiliser program for they're property**

## **Workshop objectives:**

- Understand which soil test results are used for fertiliser decisions and critical values for your farm,
- Refine phosphorus rate to match stocking rate and production goals,
- Demonstrate and use an excel based tool to assist in making phosphorus decisions to develop a comprehensive fertiliser program and budget.

**Workshop coach – Lewis Kahn**
