

Optimising irrigated clover production

VENUE	'Logan' shearing shed, 695 Logan Road, Evandale, Tasmania
TIME	10:00am to 1:00pm
DATE	Monday, 16 December 2019
PRICE	\$50 per person

This half day workshop will highlight the importance of animal nutrition, feed quality and feed budgeting with respect to increased productivity and economic performance of livestock on white clover pastures.

What you will learn:

- An outline from host producers Clare and Angus Peltzer on their production system and how white clover is used
- Clover agronomy and insect/weed management
- Grazing management, including pre and post grazing targets and stocking rates
- Internal parasite and general animal health management
- White clover variety selection
- Pasture management training opportunities.

Deliverer:

Jason Lynch, Senior Consultant, Macquarie Franklin
