Events

Sheep Technology and Innovation

How to use technology to improve in your sheep business

Presented by the Mid North Young Guns, co-funded by Making More from Sheep.

While most sheep producers agree there is a lot of benefit in implementing new technology on-farm, adopting new technology is not always that simple!

This event, Sheep Technology and Innovation will help you take the steps towards improving your profitability using new technology, including how to plan and manage a technology project, how to convince business and family members to take on practice change, and what benefits are available from a range of technological solutions.

Featuring:

- Hamish Dickson, AgriPartner Consulting: *Creating a burning bridge; how to motivate your farming business to try new things*
- Patrick Redden, Rural Directions Pty Ltd: *Planning for success; how to manage a technology project*
- Presentations and demonstrations from sheep technology suppliers
- Update on the Mid North Young Guns technology scholarship projects investigating internet connectivity, remote camera monitoring, wool measurement and recording, electric fencing and EM38 mapping

When: Wednesday, 17th August 2016

Where: Mintaro Football Club

Time: 10:00am – 4:30pm

Your investment: MNYG 2016 members: \$20 and all other participants: \$40

Catering: BBQ lunch and afternoon tea provided
