

Grazing fundamentals EDGE

Emerald, Qld: 5th December 2025

VENUE CH CoLab, 9-13 King Street, Emerald

TIME 8.30am to 4.30pm

Grazing fundamentals EDGE is a workshop designed to give you a broad understanding of the components of the grazing production system and the core, scientifically-backed principles behind optimising grazing land productivity.

Attending this workshop will help you to understand:

- the soils and plants in your area
- connections between land condition, pasture growth and animal production
- the importance of ground cover and soil moisture
- how to allow for climate variability when planning
- the process and components involved in forage budgeting
- the different grazing systems available.

What you will learn:

- what influences pasture growth and quality
- local seasonal pasture growth patterns and key decision dates
- how soil properties influence pasture growth
- how grazing affects pasture plants, their productivity and growth
- how to assess land condition and how this impacts carrying capacity
- when and how to use pasture spelling
- principles behind successful grazing systems
- how to account for different classes of animals when assessing grazing pressure
- what's involved with forage budgeting and calculating carrying capacity.
