

Pastures update

Tropical pastures and mixed species fodder crops in Southern NSW

 **11 October 2023 | 10:00am–1:00pm**

 **Mrytle Park, Henty, NSW**

 **Free, catering provided**

On the agenda

Tropical pastures update

Emma Smith (Holbrook Landcare Network)

Hear about recent project results from a gibberellic acid and urea strip trial on sub-tropical pasture. A chance to hear producer experiences growing sub-tropicals and other pasture mixes in Southern NSW. Come along with any trial ideas for the upcoming sub-tropical growing season.

Producer pasture experience and field walk

Steven Scott and Neale Terlich (Scotts Angus)

Hear from Steven Scott (owner) and Neale Terlich (manager) of Scotts Angus about recent pasture trials on-farm with digit grass, lucerne mixes and mixed species fodder crops. Join us for a paddock walk.

Mixed species annual fodder crops to increase grazing animal production

Dr Mark Norton (NSW DPI Pasture and Crop Physiologist/Agronomist)

Hannah Fahey (Development Officer)

Hear from the NSW DPI on project results to date of mixed species and single species fodder crops, offering flexibility to grazing systems by filling the autumn/winter feed gap. Hear about the livestock production considerations and benefits of mixed species fodder crops in the mixed farming region.

This event is funded by Meat & Livestock Australia with the support of Holbrook Landcare Network
