the future of farming

INNOVATION EXPO

27 July - Riverine Plains Farm Tour

A tour looking at innovative weed management techniques, trials looking at a number of production inputs, a BBQ lunch then in-yard comparison of automated sheep handlers and EID livestock technologies. This is followed by welcome drinks at a winery.

27 July - Upton Engineering Welcome Drinks

Enjoy a tour of Squires Winery followed by drinks and canapés while connecting with farmers.

28th July - Riverine Plains Innovation Field Day and Towards 2030 Forum

Over 70 leading Innovative Tech providers at our Innovation field day. Introducing farmers to new and innovative solutions for the management of specific farming system issues in the region. To be held at the Yarrawonga showground, the field day will be an informal event, where participants can interact directly with exhibitors. The Field day will also include access to the Towards 2030 Forum tent. Tickets include all-day tea and coffee, light refreshments, and a BBQ lunch.

28th July - New Edge Microbials Gala Dinner

The gala dinner will kick off with pre-dinner drinks and canapés, followed by a two-course sit-down dinner, a charity auction, live music and live entertainment by Dave O'Neil. An auctioneer will perform the charity auction to support our Scholarship Fund, a charity (ACNC Registered DGR) run by Riverine Plains to support University students in their agricultural focused studies.

29th July - Seed Force Innovation Conference

The Innovation conference will include trade stalls, two hours of networking presentations by a range of forward-thinking speakers (during morning tea and lunch breaks). For farmers, this is a day to listen to and take inspiration from speakers that will challenge the status quo, and share ideas, insights, and reflections on innovation and markets. For event partners, it is an opportunity to showcase a product, technical expertise or present an idea.

A SNIPPET INTO THE EXHIBITORS ON THE DAY ARE AS FOLLOWS

Weisner

Your local AGCO dealer, the experts when looking for new farm machinery. Showcasing the brand new Fendt IDEAL

Ceres Tag

Animal management and identification tag.

Constructive Energy

Energy solutions to decrease your power costs on farm.

Farmbot

Provide farmers with a smart, cost effective and easy to use solution to better manage water.

Farmo

Monitoring trough water levels remotely allows you to detect and fix before it becomes a problem.

FeedTech feeding systems

Saving on labour and feed wastage, improved animal welfare and with the technology of the App.

myFARMSMART

Using in-built scientific data and industry best practice frameworks, specific to your region.

AgWorld

Allows you to collect data at every level of your operation and share this data

Optiweigh

Accurately monitor livestock weight gain.

Pairtree

Stand-alone app that has the basics to manage a farm, weather, markets and satellite imagery.

Precision Agriculture

Providing extensive grid soil sampling and high quality VR Mapping for maximum input utilisation and yield return.

FeedTech feeding systems

Saving on labour and feed wastage, improved animal welfare and with the technology of the App.

Upton Engineering

Australia's centre pivot specialists. Australia's centre pivot irrigation specialists, delivery and installation.

Zetifi

Provides accessible network across farms allowing farmers to adopt transformative agricultural technologies.
