

Using Technology in Lamb Finishing Systems – Field Day

 **Tuesday 29 September, 2026 | 10.00am – 3.30pm**

 **Corroboree, The Escort Way, Boree, NSW 2800**

Lunch provided – RSVPS essential for catering purposes

Want to improve the efficiency of your lamb finishing system?

Come along to an interactive on-farm information day discussing different aspects of lamb finishing systems with the assistance of technology. This is your chance to share your experiences and hear firsthand from producers using technology to make informed decisions in their business. Information on genetics and livestock health will also be covered on the day.

This day is part of the MLA producer demonstration site 'Demonstration of Optiweigh use in Lamb Finishing Systems'.

Guest speakers and topics include:

- **Tim Gole** – (For Flocks Sake) - Setting weaners up for success
- **Angus Gilbert** - (Optiweigh) - Capturing and interpreting data using remote weighing technology in sheep businesses
- **Will MacSmith** – (Crown Agriculture) - Using data in lamb finishing systems to make informed management systems
- **Kieran Smith** – (For Flocks Sake) - Breeding and feeding decisions in customer focused lamb production systems.

This event is funded by Meat & Livestock Australia with the support of:
