

Lot feeding brief

Results for the September quarter 2024 feedlot survey

Erin Lukey – Senior Market Information Analyst – insights@mla.com.au

November 2024

Summary

- In Q3 of 2024, turn-off lifted across all states between 17% and 66% compared to the same quarter in the previous year. This increase resulted in a 39% or 241,913-head national lift, reaching 859,930 for the second-largest quarter on record.
- The number of Australian cattle on feed has remained above 1.4m head, maintaining record-breaking growth. State records occurred in NSW and SA, while Queensland and Victoria dipped in numbers.
- Growth has plateaued this quarter with capacity remaining steady at 1.6m head. Utilisation stayed high yet stable, with 87% of built capacity in use.

From the previous quarter:

- Queensland, the largest lot feeding state, saw both its capacity and the number of cattle on feed level off, with a slight decrease after the previous quarter's record high. Capacity eased by 1%, while cattle on feed declined by 3% to 829,128 head, maintaining a utilisation rate of 90%. The state turned off just under half a million head, a 10% increase to 499,834 head, marking the third-largest figure on record.

From the previous quarter: continued...

- NSW continues to break state records, with capacity growing by 1% and numbers on feed increasing by 3% to 397,342 head for a utilisation of 84%. Feedlots took advantage of differing conditions in the south to restock pens, leading to a 42% lift from the previous quarter, with numbers remaining high at 277,883 head.
- Dry conditions across SA prompted greater use of feedlots for finishing. The sector achieved record capacity, up 6%, and a record number on feed, up 9% to 75,697 head, with a near-record utilisation rate of 96%. Turn-off reached a record high as well, increasing by 8% from the last quarter to 46,690 head.
- Capacity and utilisation remained flat in Victoria. Numbers on feed eased 1% to 59,762, making Victoria the only state to decrease its turn-off rate, which eased by 5% to 39,869 head.
- WA’s seasonal sector, typically at a low point in Q3, lifted across all metrics this quarter. Capacity rose by 8%, and numbers on feed increased by 26% to 62,393 head, achieving a utilisation rate of 70%. Turn-off also rose, lifting by 35% from the previous quarter to 45,654 head.

Grainfed exports

- Quarterly grainfed exports exceeded 100,000 tonnes shipped weight (swt) for the first time on record. This is up 11% on the previous record, and 19% above Q3 last year.
- Japan remained the largest grainfed market, importing 32,511 tonnes swt, accounting for 32% of all grainfed exports, despite a 9% reduction.
- China followed with 25% of grainfed exports, importing 25,059 tonnes cwt, while Korea, the third-largest market, imported 21,301 tonnes swt (21% of exports).
- The remaining 22% of grainfed exports went to other markets, with exports to the US increasing 59% to 4,661 tonnes swt.

Figure 3: Grainfed cattle turn-off

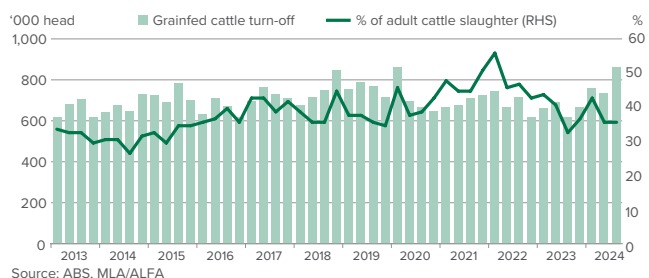

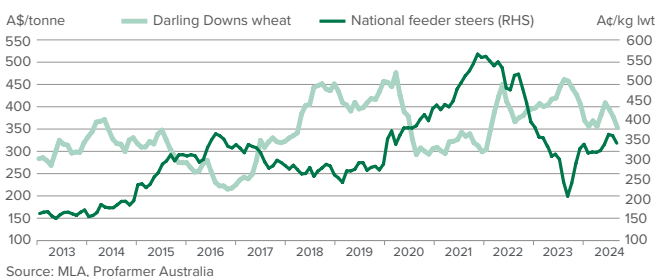

Figure 4: Feed grain and feeder steer prices

Domestic steer and feed price and supply

- The supply of feeder cattle through saleyards lifted 7%, with yardings for the quarter reaching 97,728 head, marking the largest quarterly throughput since 2015.
- Queensland and NSW drove this increase, rising by 15% (39,434hd) and 6% (49,883hd) respectively, while SA and Victoria declined by 32% and 27% due to challenging conditions.
- Prices rose across the board, with national feeder steer prices reaching 357¢/kg lwt, up 10% from the previous quarter and 23% from the previous year. All states experienced price increases between 9% and 11%, with NSW recording the highest price at 372¢/kg lwt and WA the lowest at 326¢/kg lwt.
- Darling Downs wheat prices lifted in the September quarter by 7% or \$24 to \$393/tonne.
- Rising feed and steer costs have pressured feedlot margins, though reductions in both over September indicate a positive trend moving forward.

Table 2: Numbers on feed by feedlot size

Feedlot size (head)	Sep-24	Jun-24	Sep-23
< 500	9,902	12,207	11,405
500–1,000	38,748	42,996	35,365
1,000–10,000	417,321	404,814	349,711
>10,000	958,421	958,175	861,896
Total	1,424,392	1,418,192	1,258,377
