

The Producing Profitable Southern Beef Heifers (L.ADP.2202) was terminated on 18 November 2022 through mutual agreement. It was determined that the project needed a full scope redesign. Following this redesign, the Producing Profitable and Resilient Southern Beef Herds (P.PSH.1511) was contracted, commencing in June 2024. A key feature of this project is the updating of the More Beef from Pastures training modules and establishment of producer's groups focusing on best-practice livestock management. Latest updates on this project can be found via: [Profitable and Resilient Southern Beef Herds](#)
