CONTENTS OF SECTIONS

This manual takes the feedlotter and consultants through the stages of selecting a suitable site, designing the feedlot and its facilities, their construction and the overall management of the project.

In this electronic version, 48 sections are divided into four main subject groups. Each section provides the relevant technical information, and is well illustrated with figures and photographs.

Each section can be selected as required with a click of the computer mouse. High resolution pdfs allow the reader to zoom into any image to investigate detail.

Site selection
1. Site selection
2. Site layout
3. Water supply and sources
4. Water requirements
5. Water quality
6. Energy supply and source
7. Site investigations
8. Earthworks

Site design
9. Overall pen layout
10. Pen and drainage systems
11. Sedimentation removal systems
12. Holding pond design
13. Access and internal roads
14. Water reticulation system
15. Fences, gates and lanes
16. Shade
17. Pen and road surfaces
18. Pen and road stabilisation
19. Feeding systems
20. Water trough design and sewer systems

Feedlot facilities
21. Livestock handling
22. Receival and dispatch facility
23. Processing facility
24. Building over processing facility
25. Cattle crushes
26. Office and amenities
27. Truck weighbridges
28. Feed preparation and commodity storage
29. Grain processing equipment
30. Grain storage and handling
31. Commodity storage
32. Silage
33. Hay storage
34. Liquid feedstuffs
35. Feed mixing and delivery
36. Hospital and recovery pens
37. Stables
38. Fuel and gas storage
39. Chemical storage
40. Mechanical workshops
41. Cattle wash facilities
42. Vehicle wash down
43. Automatic weather stations
44. Covered housing systems

Project management
45. Feedlot construction delivery
46. Design drawings and technical specifications
47. Project tendering
48. Project management
